

FOR IMMEDIATE RELEASE

New iPod Battery Service Provider, ipodjuice.com, Differentiates Itself from the Competition with Robust Batteries, Detailed Instructions, Effective Tools, and Superior Service

ipodjuice.com sells battery replacement kits for all models of the Apple iPod and iPod mini and has experienced technicians that can replace the iPod battery for you.

San Antonio, TX (PRWEB) September 12, 2005 – <http://ipodjuice.com/> [ipodjuice.com], a new iPod battery service provider located in San Antonio, TX, provides battery replacement kits that uniquely differentiate them from the competition. “There are many companies that sell iPod batteries, but they don’t provide customers with the proper tools or guidance, which results in frustration and, even worse, increases the likelihood of damaging the player”, said Anthony Magnabosco, owner of ipodjuice.com.

ipodjuice.com is the only iPod battery provider that offers the http://www.ipodjuice.com/reason.html#Effective_Tools [iOpener] a unique tool that efficiently opens an iPod or iPod mini. The iOpener has a sharp, wedge-shaped head that slips into the narrow seam of the player, and a long, solid handle. Other companies include cheap, flimsy tools that customers struggle or don’t provide any tools at all. Also included with each kit are http://www.ipodjuice.com/reason.html#Effective_Tools [detailed instructions] with vivid, color photographs that walk customers step-by-step through the iPod battery replacement process and highlight areas where caution is warranted.

In addition, ipodjuice.com provides http://www.ipodjuice.com/reason.html#Robust_Batteries [robust batteries] that far exceed the playtimes offered by the standard ones inside most iPod and iPod mini players. “It’s not unusual to increase your playtime by several hours longer than what you used to get with your first iPod battery”, added Magnabosco.

For those reluctant to replace the iPod battery themselves, ipodjuice.com has experienced technicians who can replace the battery in an iPod or iPod mini for as little as \$20. “In most cases, iPod batteries are replaced the same day that we receive the device and ship back to the customer on the following business day”, continued Magnabosco.
